You are invited to review and respond to this Invitation for Bid (IFB). In submitting your bid, you must comply with these instructions. On March 4, 2022, Governor Gavin Newsom issued Executive Order N-6-22 (the EO) regarding Economic Sanctions against Russia and Russian entities and individuals. "Economic Sanctions" refers to sanctions imposed by the U.S. government in response to Russia's actions in Ukraine, as well as any sanctions imposed under state law. Should the State determine Contractor is a target of Economic Sanctions or is conducting prohibited transactions with sanctioned individuals or entities, that shall be grounds for rejection of the Contractor's bid/proposal any time prior to contract execution, or, if determined after contract execution, shall be grounds for termination by the State.

A Disabled Veteran Business Enterprise (DVBE) goal is not required, but DVBE participation is encouraged, and a DVBE incentive may apply to this IFB. See **Section D, Special Programs, Item 1**, in this IFB for requirements.

As required by Executive Order S-02-06, the California Department of Forestry and Fire Protection (CAL FIRE) is committed to meeting the State's 25 percent (25%) Small Business (SB) participation goal. Upon completion of the work or as directed, contractor shall replace premises and adjacent property in good condition.
- e) Contractor shall be entirely responsible for any damage to the property due to hauling or other causes attributable to this work, including roads, curbs, fences, utilities, or other permanent improvements needing to be disturbed to the extent required. All such damaged portions shall be repaired when directed and as required to place them in as good condition as existed before the commencement of the work.

2) Acceptance

- a) Until the State makes formal acceptance of the work, contractor shall have the charge and care and shall bear the risk of injury or damage to any part of the work by the action of the elements or from any other cause, whether arising from the execution or from the non-execution of the work.
- b) The State will accept work performed under this contract in writing when all work has been completed satisfactorily to the State. In judging the work, no allowance for deviations from the original scope of work will be made unless already approved in writing at the proper times and in the manner called for in the contract.

3) Rejection

- a) Should any portion of the work or materials fail to comply with the scope of work or provisions listed herein, the work or materials will be rejected. Contractor will immediately correct the work or materials in question, to the satisfaction of the State.
- b) Any work done that does not comply with any laws, rules, or regulations will be remedied at contractor's expense.

4) Guarantees

- a) Contractor shall unconditionally guarantee the work of the contract to be free of defects in workmanship and materials for a period of one year from date of State's acceptance of the work.
- b) Contractor shall unconditionally guarantee the work of the contract to be free of defects in workmanship and materials for a period of one year from date of State's acceptance of the work, unless a longer guarantee period is specifically called for. Prime contractor shall be responsible for the one year guarantee and shall sign for the entire work. The guarantee may also be countersigned by the subcontractor.

G. Liabilities

- 1) Contractor shall, at own expense, rebuild, repair, restore, and make well all injuries or damages to any portion of the work before its completion and acceptance.

EXHIBIT E
(Additional Provisions)

- 2) State shall not be answerable or accountable in any manner for any occurrences over which contractor has control and responsibility. This includes injury or damage from any cause that might have been prevented by the contractor or contractor's workers or anyone employed by contractor. Occurrences include but are not limited to injury to any person whether worker or the public, damage to any portion of the work, damage to materials or equipment used, or damage to adjoining property.
- 3) Contractor shall be responsible for any damage to any person or property resulting from defects, obstructions, or any other cause during the progress of the work at any time before its completion and final acceptance. State may retain money due contractor under the contract until disposition has been made of any suits or claims for damages filed for injuries or damages sustained by contractor, contractor's servants, or agents, provided that sworn statements of these claims are filed with the department or any other appropriate State office.
- 4) Neither the Director of CAL FIRE nor any other officer or authorized assistant of the department shall be personally responsible for any liability arising under the contract.

H. Changes

1) Requests

- a) If any conflict arises between provisions of the plans, specifications, scope of work, and any such law, then contractor shall notify the State at once. Such changes must be approved in writing but do not require a Change Order. All other types of changes will require the issuance of a Change Order duly approved either before making the change or, in the case of emergency changes described below, after the emergency change has been completed.
- b) State shall be at liberty to order, in writing, changes in the plans and specifications, or alterations, additions, or omissions in the work at any time prior to the formal completion and acceptance of the work without in any way voiding the contract and the Contractor shall comply with such orders.
- c) Any change or deviations from the contract plans and specifications or in the work made without authority in writing from the State will be the responsibility of the Contractor.
- d) Whenever the necessity for a change arises either at the request of the Contractor or at the request of the State, the Contractor shall take note that a change is pending and he shall take all necessary steps to halt such other work in the area of change that would be affected by the ultimate change until such time as the change is approved.

2) Detailed Estimates

- a) When a request for a change is made by or received by contractor, the contractor shall prepare a full and completely detailed estimate of cost for the change, including itemized estimates for subcontractors work, and accurate quantities and unit prices for all items to be added or omitted by reason of the change. Changes requiring labor and/or materials over and above quantities originally called for will be paid for as an extra to the contract, while changes resulting in lesser quantities of labor and/or materials shall be credited to the State by contractor.
- b) The costs of extra work shall be estimated at current market values to which may be added five percent (5%) for overhead, ten percent (10%) for profit, and one percent (1%) where additional bonding is required. Credit for work omitted shall be on the same basis except that no credit for overhead or bond will be exacted. Unit prices shall be comparable with prices used by the Contractor in the original estimate if requested by the State. Estimates for requested changes shall be submitted promptly and in all cases within fifteen (15) calendar days from the date of request.

3) Emergency Changes

Changes in the work made necessary due to unexpected or unforeseen site conditions, discovery of errors in plans or specifications requiring immediate clarification in order to avoid a serious work stoppage, or changes of a kind where the extent cannot be determined until completed are types of emergency changes which may be authorized by the State in writing to contractor. The added price or credit for emergency changes shall be

EXHIBIT E
(Additional Provisions)

determined as provided herein for regularly issued Change Orders. In all such cases the contractor shall comply with the written orders and shall apply for and shall receive a standard form of Change Order as soon as the emergency change has been completed. Compensation for emergency changes will not be due contractor until he receives a confirming Change Order.

4) Time

- a) Each estimate for a change in the work submitted by the contractor shall state the amount of extra time that should be allowed for making the requested change. If no extra time is requested, it is assumed that the changes will be effected within the originally allotted time for the contract.
- b) State will consider all factors in judging the amount of additional time to be allowed by reason of changes in the work and will set forth in the Change Order the amount of extra time that will be allowed for each change.

5) Change Orders

Contractor shall not make any changes other than emergency changes described above until State provides contractor with an approved and signed formal Change Order. State will not recognize any change in the contract sum due contractor until an approved Change Order has been issued in writing on an approved State form. The Change Order must show a full description of the change to be made, the extra time required for making the changes, and the agreed price to be added to or deducted from the contract sum. Drawings with notes and/or specifications accompanying the Change Order shall be deemed a part of the Change Order. Extra work called for by the Change Order shall be performed in accordance with the original contract drawings and specifications, except for the deviations specifically called for by the Change Order.

6) Failure to Agree

- a) In case contractor and State fail to agree on the extra cost or credit for a proposed change, State may order contractor to proceed with the change in order to avoid a serious work stoppage and the proper cost or credit for the change shall be determined as follows:
- b) For added work, contractor shall proceed on a time and material basis, keeping an accurate daily record of the cost of labor and material used under the change and submitting each day's records to the State's representative for review and approval. Upon completion of the change, a Change Order will be issued to contractor based on cost, plus overhead, profit, and bonds.
- c) For omitted work, the estimated amount of credit which the State contends is due may be withheld from any payment due contractor. Such sum will be withheld until contractor presents indisputable evidence that the State's estimate is in error.
- d) Should contractor fail to establish a valid claim, the entire amount withheld will be retained by the State; but should contractor establish that State's estimate was in error in part or in whole, State shall refund contractor the difference.

I. Time of Work and Damages

- 1) State will designate the starting day of the contract when contractor shall immediately begin and diligently prosecute the work to completion. Contractor is obligated to satisfactorily complete the work on or before the contract's expiration date, to be determined from the number of working days stated in the agreement, plus such days as may be properly allowed by State.
- 2) If all the work called for under the contract is not finished or completed before the expiration of the contract, State will sustain damage. As it is and will be impracticable and extremely difficult to determine the actual damage which the State will sustain because of any delay, contractor will pay to State liquidated damages of one hundred dollars (\$100) per day for each day's delay in finishing the work. If contractor fails to pay liquidated damages, CAL FIRE may deduct from contractor the amount from any money due under the contract. The contractor shall not be assessed liquidated damages for delay in completion of the project when such delay was caused by failure of the public agency or owner of the utility to provide for removal or relocation of utility facilities.

EXHIBIT E
(Additional Provisions)

- 3) If the work called for under the contract is not completed within the time specified, the director shall have the right to extend or not extend the time limit for its completion as may best serve the interest of the State. The director shall further have the right to charge to contractor or Contractor's heirs, assigns, or sureties and to deduct from the final payment for the work, all or any part of the actual cost of engineering, inspection, superintendence, and other overhead expenses which are directly chargeable to the contract, and which accrue during the period of such extension.
- 4) Contractor shall not be assessed with liquidated damages the cost of engineering and inspection during any delay in the completion of the work caused by acts of God or of the public enemy, acts of State, fire, floods, epidemics, quarantine restrictions, strikes, freight embargoes, and unusual action of the elements, or delays of subcontractors due to such cause, providing contractor shall notify State in writing of the causes of delay within ten (10) days from the beginning of any such delay. State shall determine the facts and extent of the delay, and its findings of the facts shall be considered final and conclusive.
- 5) The term "unusual action of the elements" is limited to weather or related effects that cause a complete work stoppage of the controlling item of work at the site of the project for one or more full workdays.

J. Asbestos

In the event the contractor who is providing services under a service contract discovers asbestos, contractor shall stop all work immediately and notify the State contract coordinator, construction supervisor and/or project manager. After State has assessed site conditions and extent of asbestos-related work, State shall prepare and award a separate contract to a contractor who is registered and certified for asbestos abatement work. Under both State statute and State regulations found in the California Code of Regulations, a contractor must be certified by State Contractor's License Board and registered with the State Department of Industrial Relations, CAL-OSHA, in order to perform asbestos-related work. Contractor shall resume work under this contract only after the State gives notification to proceed.

K. Brand or Trade Names

Brand or trade names are given to establish quality, and no special preference by the State for these manufacturers is intended or implied. Where only one brand or trade name is listed, it is the only brand or trade name known to State for the particular product. State may permit contractor to use alternate product materials or equipment that is of equal quality and of required characteristics for the purpose intended if approved in writing by the State. Contractor must submit a request for approval of all alternate products in triplicate within seven (7) days of award of contract. Any such requests should be directed to the Chief Engineer, Technical Services Section, California Department of Forestry and Fire Protection, P.O. Box 944246, Sacramento, CA 94244-2460. CAL FIRE's chief engineer shall be the sole judge as to the comparative quality and suitability of the alternate and the decision shall be final. No additional compensation will be allowed for the installation of approved substitute items.

L. Interruption of Services

Contractor shall make provisions to accomplish the work of this contract without undue interference with the CAL FIRE operations. Interruptions to any services for the purpose of making or breaking a utility connection shall be made only after consultation with the State Representative and shall be at such time and of such duration as may be directed.

M. Cooperation Between Contractors

Where two or more contractors are employed on related or adjacent work each shall conduct operations in a manner which will not cause any unnecessary delay or hindrance to the other. Each contractor shall be responsible to the other for all damage to work, person, or property, or for loss caused by failure to finish the work within the time specified.

N. Conflicts in Documents

If conflict occurs between documents, priorities are:

EXHIBIT E
(Additional Provisions)

- 1) Addenda govern over all other contract documents to the extent specified, followed by specific conditions, followed by general conditions.
- 2) Plans govern over specifications; within these, schedules govern over all other portions of plans, followed by specific notes. Larger scale drawings govern over smaller, and figured or numerical dimensions govern over scaled dimensions.
- 3) If there is conflict between provisions, codes, safety orders, contract documents, manufacturer's specifications, or industry standards, the more restrictive and higher quality govern.
- 4) If contract documents omit a requirement for proper construction system, or for combining or installing parts, materials, or equipment, and if there is an accepted trade standard for construction quality and performance, then contractor shall follow trade standard.

O. Change Authorization

CAL FIRE Chief of Technical Services or designated representative shall be the only individuals authorized to approve changes to the plans/specification, alternate materials/methods, or submittal materials.
