Additional Information

The 80th Texas Legislature passed House Bill 3106 that charged the Comptroller's office with establishing clear standards for implementing an Enterprise Resource Planning (ERP) system for the State of Texas. The Comptroller's office subsequently developed an ERP financials and HR/payroll solution called the Centralized Accounting and Payroll/Personnel System (CAPPs) that delivers the functionality required by HB 3106 for Texas state government. The CAPPs platform is built from Oracle's PeopleSoft suite and is upgraded and maintained with the latest images and patches as delivered by Oracle.

CPA does not anticipate issuing any additional notices prior to the commencement of the procurement. If CPA does supplement this Notice with additional information, such information will be appended to this Notice via numbered addenda.
